

## ENVIRONMENTAL POLICY

At Powerhouse we provide electrical contracting services to the domestic, commercial, industrial and government markets.

In everything we do, wherever we operate, environmental protection is a key focus.

Our objectives are to manage environmental impacts (things we do that can change the environment in good or bad ways), conserve resources, prevent pollution, and to operate lawfully according to acts and regulations. This is done by using our Quality, Work Occupational Health and Safety & Environmental (QWHSE) Management System. Instructions on how to use the System are in the QWHSE Manual. The environmental elements of the System are based on the framework of the internationally recognised standard, ISO 14001 for Environmental Management Systems.

Our QWHSE Management System also helps to achieve these environmental targets which we measure and report on. This is done for the purpose of checking Environmental System performance and to make improvements.

We have targets as set out below.

- *100% of all new workers and those unaware of the QWHSE Management System to have completed induction before starting their duties with Powerhouse,*
- *Zero environmental incidents/accidents,*
- *Zero prosecutions (includes fines) for environmental mismanagement (including pollution) issued by the state government environmental regulator,*
- *Zero correction notices and similar notices issued by the state government environmental regulator,*
- *Zero written complaints on environmental management matters made by customers and other members of the community.*

We are committed to complying with the current environmental laws in our state:

- *Environmental Protection Act 1986*
- *Environmental Protection Regulation(s)*

We are also committed to complying with other requirements which relate to environmental aspects - things we do that can affect the environment.

Our Powerhouse workers are inducted so they are aware of the values and aims in this Environmental Policy. They help to fulfil the statements in this Policy. This includes improving environmental performance and the continued improvement of the QWHSE Management System.

This Policy is made available to members of the public, customers and regulators when requested. Management reviews this Environmental Policy each year to make sure it is current and effective in protecting the environment.

Corey Dowler,

Michael Jauncey,

Directors, Powerhouse Wiring Solutions Pty Ltd 01/09/23
